EMPATHY

- Many people face stress, anxiety, and mood changes.
- Users hesitate to share feelings due to fear of judgment or stigma.
- **Goal:** Provide a safe, supportive, and judgment-free space for mood tracking and relaxation.

DEFINE

“Mental Wellness Companion” is a website that helps users track moods, chat anonymously with peers, and access relaxation exercises. It provides a safe, supportive, and easy-to-use platform for improving mental well-being.

IDEATE

- Mood tracking for daily emotional check-ins.
- Anonymous peer-to-peer chat platform.
- Guided relaxation exercises (audio, video, breathing).
- Personalized mental wellness tips based on mood patterns.

PROTOTYPE

- **Mood tracking** dashboard to monitor daily emotional states.
- **Anonymous chat platform** for safe peer communication.
- Library of guided relaxation **exercises** to manage stress.

TESTING

- Real users try the prototype to see if it helps them track moods, chat anonymously, and use relaxation exercises comfortably.
- Feedback is collected on usability, accessibility, engagement, and emotional support.
- Based on feedback, we make improvements and iterations to ensure the website truly provides a safe, supportive, and effective platform for mental wellness.
